

TABLE OF CONTENTS

S.No.	EXPERIMENT TITLE	PAGE NO	MARK	SIGNATURE
1	Conceptual Database design using ER Model			
2	Data Definition Commands • Creating tables with constraints, constraint violations • Schema modifications			
3	Data Manipulation Commands • Update operations • Simple SQL queries • Transaction Control statements - Savepoint and Rollback			
4	Complex SQL Queries • Nested Queries • Correlated Subqueries • Joins and Outer Joins • Aggregate functions • Grouping and Ordering commands			
5	Create view and index for database tables with a large number of records			
6	Database Programming: PL/SQL -Procedures and Functions			
7	Write SQL Triggers for insert, delete and update operations in a database table			
8	Perform Normalization in a Database System			
9	Write a python Program to interact with MongoDB using the PyMongo Library			
10	Implement a database application by applying database programming using library class			
ADDITIONAL EXPERIMENTS				
11	Exception Handling in PL/SQL			
12	Implicit Cursor & Explicit Cursor			
OPEN ENDED PROGRAM				
13	Employment Management System using python			
DESIGN BASED PROGRAM				
14	Lock Analysis Queries
